

## Email Services

LuxSci's email services feature quality email solutions for all of your needs. Our services include standard and secure WebMail, IMAP, SMTP, and POP3 capabilities.

### WebMail

Our WebMail portal offers access to secure, reliable email from anywhere with an Internet connection. Every LuxSci user has access to WebMail features such as:

- Custom Email Filtering
- Email Folder Management
- Auto-Responders
- Custom Signatures
- Shared Folders
- Personal and Shared Address Books
- Personal and Shared Calendars
- Advanced Searching
- Advanced Sorting
- Message Annotation
- Message Tagging

### IMAP

Our IMAP service allows you to access your email from any computer with an Internet connection – home, work, anywhere. Your email is stored on our servers, so you always have access to the same data, no matter where you are. IMAP is ideal if you use multiple computers or if you want to share an account between several people simultaneously. Our IMAP service is compatible with many IMAP email clients, such as Outlook, Thunderbird or Entourage. We support secure IMAP and automatically backup all your IMAP email for you.

### SMTP

Our SMTP service lets you use an email client like Outlook, Thunderbird or Entourage to send outgoing email through our email servers. We provide multiple alternate SMTP ports so that you can send mail even if you are behind strict firewalls. We also offer anonymous SMTP ports that allow you to hide personal information such as internet IP addresses that are included in normal emails. We support secure SMTP access.

### POP3

Our POP3 service allows you to download email to your computer as it arrives, without using up your account's disk space. Our POP3 service is compatible with many POP3 email clients, such as Outlook, Thunderbird or Entourage. We support secure POP3.

[SecureLine](#), [Security](#), and [Email Filtering](#) are more ways LuxSci keeps your email safe.
