

Email Collaboration

An Effortless Way to Share Information

LuxSci's standard WebMail features combine to create a powerful framework for collaboration. Stay organized, share knowledge, and work together with LuxSci's cutting edge email tools, the perfect start to easy office teamwork.

What features aid in office cooperation?

Shared Folders

- Share folders between different users and groups.
- Assign read only or read-write access to messages.
- Drag and drop messages to move them between folders.

Message Annotation

- Add notes to your emails in plain text or html
- Annotate a message as many times as necessary
- Read notes on shared messages, and add notes to any shared email that you have read-write access.

Message Tagging and Color Coding

- Add tags to messages to group messages
- Assign colors to tags for visually distinct categories.
- Label messages with multiple tags.

Using IMAP? Here's the benefit.

- Shared accounts can be accessed by multiple users simultaneously.
- All annotations can be viewed in email programs using IMAP.
- Tagging is compatible with any client that already uses IMAP keywords, such as Mozilla Thunderbird.
