

Email Filtering Overview

LuxSci protects you from Spam & Viruses with the best in filtering solutions.
Our customizable email filters help you organize and manage your mail.

Spam and Virus Protection

Basic Services:

- Uses a combination of Clam anti-Virus and SpamAssassin.
- An effective, low-cost filtering solution.

Email Defense:

- Harnesses cutting-edge Sophos, McAfee and Authentium AntiVirus Rules engines to block viruses.
- Multi-layered Solution Including: Cloudmark software Statistical Filtering, Industry Heuristics, Proprietary Heuristics, URL Filtering, Reputation-based URL Filtering.
- Combines space savings, attack prevention, and custom real-time filtering to make sure you get only the emails you want.
- Blocked emails are quarantined outside of your email folders to be checked later and do not take up any billable disk space.
- Easy global configurations.

Custom Email Filters:

- Make any number of custom email filters with LuxSci's Email Filtering tool.
- Use advanced filtering features to deal with regular expressions and character set conversions.
- Forward, sort, and delete your emails automatically.
- Create custom email headers, notifications, and auto-responders.
